voha-tosec is a new member of the MAPAL Group

Since 1 September 2018, voha-tosec Werkzeuge GmbH has been part of the MAPAL Group. voha-tosec was established in 2005 by the merger of two successful companies, voha Vollhartmetallwerkzeuge GmbH and Tosec, Tools, Service & Consulting GmbH. Today, the company employs 25 people and generates annual sales of around five million Euros. The Managing Directors of voha-tosec are and will remain the founders of the two original companies, Carsten Klein and Dieter Scheurer.

"We are strengthening our commitment to tool and mould making," explains Dr. Jochen Kress, President MAPAL Dr. Kress KG, "and so we are pleased to welcome voha-tosec to the MAPAL Group, a company that has shown comprehensive expertise in this sector."

voha-tosec not only offers milling tools but above all appropriate services in the high performance sector. In addition to tool making and mould making, tools – ranging from the smallest solid carbide milling cutters to complex indexable insert tools – are used in medical and dental technology, aerospace and the plastics processing industry. The motto of the company from Lindlar in North Rhine-Westphalia is "Challenging Limits". In addition to working together with its customers, this is another point that predestines the company to belong to the MAPAL Group.

"We are pleased to be part of the internationally operating MAPAL Group. With our global presence and the corresponding sales network, we expect further growth," says Carsten Klein. The two Managing Directors, Klein and Scheurer, were convinced by the way MAPAL integrate companies into the Group and help them to grow: "It was important to us that the cultures of the two companies fit together."

Short profile of MAPAL Dr. Kress KG:

MAPAL – tooling the customer's success

MAPAL Präzisionswerkzeuge Dr. Kress KG is one of the leading international suppliers of precision tools for the machining of practically all materials. The company founded in 1950 supplies leading customers in particular from the automotive and aerospace industries and from machine and plant engineering. With its innovations the family-owned company sets trends and standards in manufacturing and machining technology. MAPAL sees itself as a technology partner, supporting its customers with the development of efficient and resource-conserving machining processes using individual tool concepts. The company is represented with production facilities, sales outlets and service partners in 44 countries. In 2017 the MAPAL Group had 5,250 employees, generating sales of EUR 610 million.
