MAPAL expands the revolutionary countersink range

Last year MAPAL launched a completely new generation of countersinks. The cutting edges of these countersinks have a noticeably unequal spacing, thus reducing the axial forces by more than 50% compared with conventional countersinks. This results in less vibration at the tool. Users have been most impressed by the new design and the improvements achieved as a result. The tools increase the precision of the countersink while improving the accuracy and surface finish.

Until now the countersink was available in five different diameters from 6.3 to 25 mm. MAPAL is now extending this range considerably. The new diameter range from 4.3 to 31 mm is tailored to the DIN standard 335 C. In addition to the sizes already available, the following will also be available from October: 4.3; 6; 8; 8.3; 10; 11.5; 12.4; 15; 19; 23 and 31 mm.

Short profile MAPAL Dr. Kress KG:

MAPAL – tooling the customer's success

MAPAL Präzisionswerkzeuge Dr. Kress KG is one of the leading international suppliers of precision tools for the machining of practically all materials. The company founded in 1950 supplies leading customers from the automotive and aerospace industries and from machine and plant engineering. With its innovations the family-owned company sets trends and standards in production and machining technology. MAPAL sees itself as a technology partner, supporting its customers with the development of efficient and resource-conserving machining processes using individual tool concepts. The company is represented with production facilities, sales subsidiaries and representatives in 44 countries worldwide. In 2014 the MAPAL Group had 4,500 employees, generating sales of EUR 510 million.
